Freight Forwarder (FF) EFTS Participation

- Option exists where Freight Forwarder can received detailed shipment and tracking data
  - Either as stand-alone application or integrated with FF's existing IT architecture/system
- Automated In-transit Visibility of FMS shipments
  - With bar code scan, FF can automatically generate transaction to reflect receipt and/or shipment
- For more information and to schedule discussions between EFTS Executive Agent and FF, contact Elizabeth.Kittredge@navy.mil
- **Important Note:** FF does not need to participate for country to immediately access the EFTS data

Import XML to Microsoft Access

Click here to download the Tutorial Video
(if this does not work, right click and choose "Save target as")

In order to import a downloaded file into Microsoft Access, several important steps must be completed. These steps involve creating a proper download procedure, Access, and performing an import. This guide will outline the required step

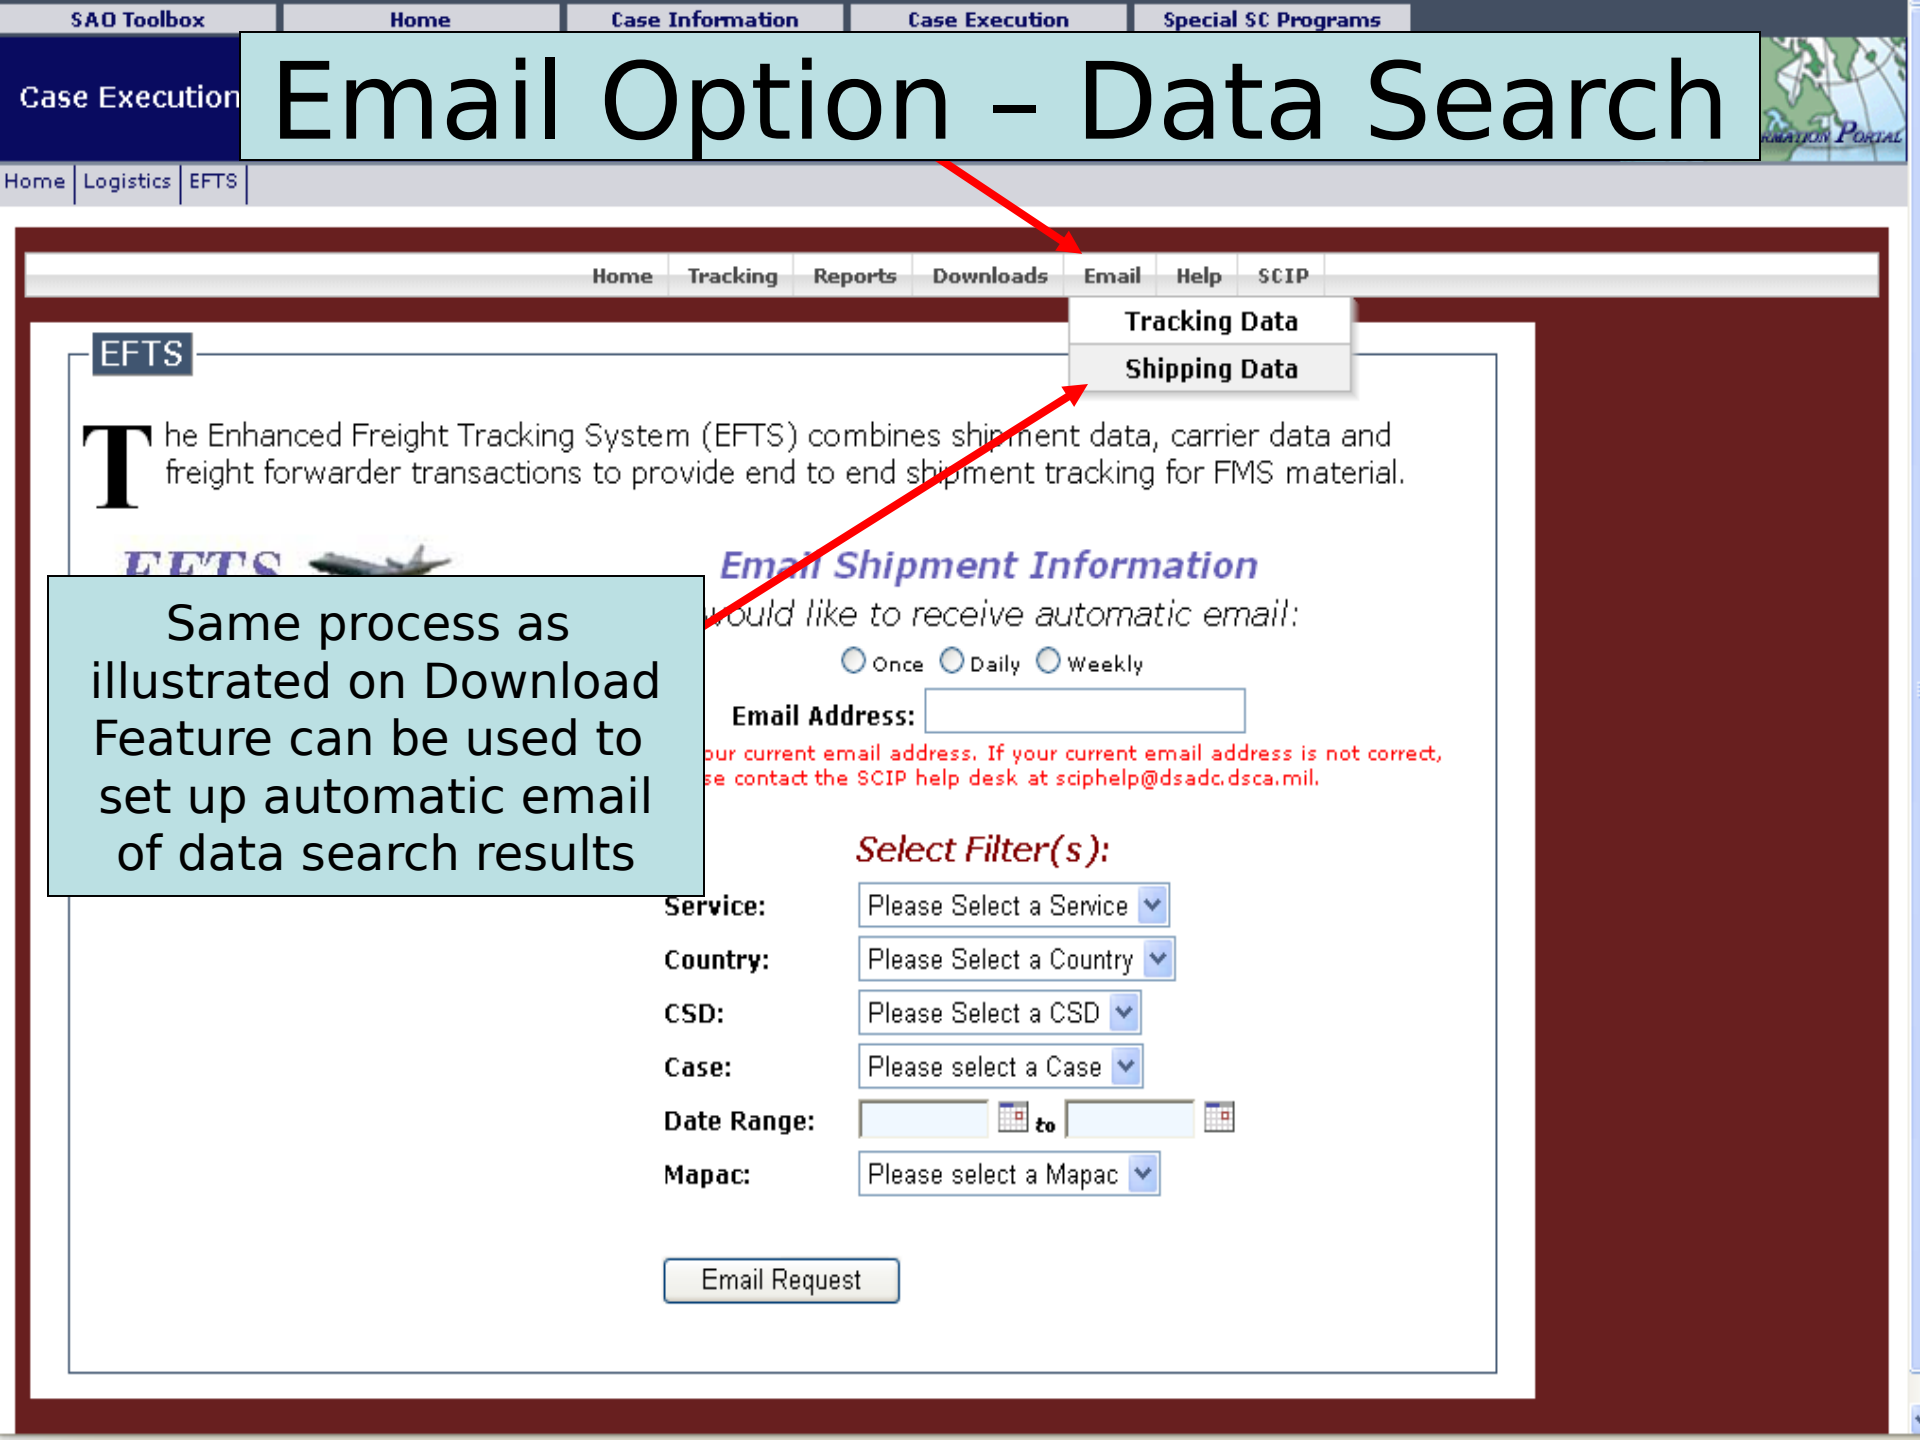
EFTS generates two types of downloadable reports: Tracking Downloa Downloads. These reports can be generated through the "Download" secti at the top of this page. Once you have generated a report, you may down computer (simply right click on the "Download Link" and select "Save Targ As" and pick a location) and proceed with the import process.

STEP 1. OBTAINING THE FILES

The file that has been downloaded is an "XML" file, a new format that cannot be imported into Access directly. In order to import this file, a special filter is required. This filter can be downloaded here:
FILTER FILE:
Tracking.xsl
Shipping.xsl

Help Narrative can be access via use of Scroll Bar, Or Video can be downloaded

Email Option – Data Search



Same process as illustrated on Download Feature can be used to set up automatic email of data search results
